The image shows a Visual Studio Code editor window with a dark theme. The Explorer sidebar on the left shows a project structure with folders like 'TEST', 'my-app', and 'components'. The active file is 'ButtonComponent.jsx' in the 'components' folder. The editor displays the following code:

```
1 import React from 'react'
2
3 export default function ButtonComponent({img,title,description}) {
4   return (
5     <div className="shadow-xl border-red-500/30 border-4 rounded w-64">
6       <div className="h-48">
7         <img src={img} alt="placeholder"></img>
8       </div>
9       <div className="p-4">
10        <h1 className="text-xl font-bold">{title}</h1>
11        <p className="text-sm">{description}</p>
12      </div>
13    </div>
14  )
15 }
```

Below the editor, the 'TERMINAL' tab is active, showing a command prompt with the text '25 />'. Below the terminal, the 'PROBLEMS' panel shows a 'Syntax Error' message: 'Caused by: Syntax Error'. The status bar at the bottom indicates 'Ln 5, Col 57', 'Spaces: 4', 'UTF-8', 'CRLF', and 'JavaScript JSX'.
